What's Your Formula? Brian Washburn 2021-06-29 Your

Periodic Table of Learning Elements Engaging, effective training programs are a mixture of science and art, requiring the right balance of adult learning theory, available technology, intuitive tools, proven practices, creativity, and risk. How does a

trainer find the right combination and proportion of these elements? How does a trainer know what's possible? To answer these questions, Brian Washburn offers a simple yet elegant periodic table of learning elements modeled on the original periodic table of chemical properties.

Washburn's elements—which are organized into solids, liquids, gases, radioactive, and interactive categories similar to their chemical cousins—are metaphors for the tools and strategies of the field of learning design; when they're combined, and under certain conditions, they have the potential to create amazing learning experiences

for participants. They are that impactful. From critical gas-like elements like the air we breathe, present in every training room (think instructional design or visual design), to radioactive elements, powerful and dangerous yet commonly used (think PowerPoint), Washburn guides you through the pitfalls and choices you confront in creating engaging learning experiences. A well-designed training program can be world-changing, he argues, and if you believe in your craft as a learning professional, you can do this too. Whether you're an experienced learning designer or new to the field, this book inspires with new ideas

and ways to organize the design of your learning programs. With stories from Washburn's professional experience, the book includes a hands-on glossary of definitions and descriptions for more than 50 of his elements.

Stealing Mt. Rushmore Daphne Kalmar 2020-08-18 "Daphne Kalmar has created a wonderfully imperfect cast of characters and gathered them into a story that will break your heart. . . and heal it again. Stealing Mt. Rushmore has it all." —Marion Dane Bauer, author of the Newberry Honor

novel *On My Honor* In *Stealing Mt. Rushmore*, Daphne Kalmar brings to life the social and political upheaval of the 1970s, revealing the heart of a family on the verge of falling apart and the courage of a young girl who does all she can to bring them together. She almost always made things worse. But at least she'd be standing there. I hated her for stealing the money. But I want her back. Nellie's dad had planned on having four boys to name after the presidents on Mt. Rushmore. He got George, Nellie, Tom, and Teddy. No Abe. It's the summer of 1974. Nellie's turned thirteen. Her best friend, Maya, has a crush on a boy. President Nixon might get

impeached. And her mom's run off. The money for their family road trip to see Mt. Rushmore is missing and her dad's crawled into bed and won't get up. Nellie's sure the trip out West will fix her family, and she'll do almost anything to come up with the cash. But she begins to wonder why it's always her, the girl, who's stuck with the dishes and everything else. And how can a mom just up and leave with no note, no forwarding address, no nothing?

inspire an artist in this introduction to art history that includes a search-and-find game. "Today I will make a new painting," declares an artist, but first she must build a stretcher to stretch the canvas; select which paints, brushes, and palette knives to use; and, most importantly, decide what to paint. Will she paint a still life in the style of Robert S.

Duncanson or a portrait in the

manner of Mary Cassatt? Using reproductions of art from the National Gallery of Art by Vincent van Gogh, Judith Leyster, Claude Monet and others pivotal figures in art history, Roxie Munroe introduces readers to a variety of iconic artists, art styles, and time periods. The sweeping painting she creates by the book's end cleverly incorporates all 37 pieces she has considered. Eagle-eyed readers will love finding the works of art in her painting and learning more about the artists in the notes in the back matter. You'll want to start building canvases and mixing colors for a masterpiece of your very own!

Funds of Knowledge Norma Gonzalez 2006-04-21 The concept of "funds of knowledge" is based on a simple premise: people are competent and have knowledge, and their life experiences have given them that knowledge. The claim in this book is that first-hand research experiences with families allow one to document this competence and knowledge, and that such engagement provides many possibilities for positive pedagogical actions. Drawing from both Vygotskian and neo-sociocultural perspectives in designing a methodology that views the everyday practices of language and action as

constructing knowledge, the funds of knowledge approach facilitates a systematic and powerful way to represent communities in terms of the resources they possess and how to harness them for classroom teaching. This book accomplishes three objectives: It gives readers the basic methodology and techniques followed in the contributors' funds of knowledge research; it extends the boundaries of what these researchers have done; and it explores the applications to classroom practice that can result from teachers knowing the communities in which they work. In a time when national educational discourses focus on

system reform and wholesale replicability across school sites, this book offers a counter-perspective stating that instruction must be linked to students' lives, and that details of effective pedagogy should be linked to local histories and community contexts. This approach should not be confused with parent participation programs, although that is often a fortuitous consequence of the work described. It is also not an attempt to teach parents "how to do school" although that could certainly be an outcome if the parents so desired. Instead, the funds of knowledge approach attempts to

accomplish something that may be even more challenging: to alter the perceptions of working-class or poor communities by viewing their households primarily in terms of their strengths and resources, their defining pedagogical characteristics. Funds of Knowledge: Theorizing Practices in Households, Communities, and Classrooms is a critically important volume for all teachers and teachers-to-be, and for researchers and graduate students of language, culture, and education.
