The Trash Phenomenon Stacey

Michele Olster 2003 *The Trash*

Phenomenon looks at how writers of the late twentieth century not only have integrated

the events, artifacts, and theories of popular culture into their

works but also have used those works as windows into popular

culture's role in the process of nation building. Taking her cue

from Donald Barthelme's 1967 portrayal of popular culture as

"trash" and Don DeLillo's 1997 description of it as a subversive

"people's history," Stacey Olster explores how literature recycles

American popular culture so as to change the nationalistic

imperative behind its inception. *The Trash Phenomenon* begins

with a look at the mass media's role in the United States'

emergence as the twentieth century's dominant power. Olster

discusses the works of three authors who collectively span the

century bounded by the Spanish-

American War (1898) and the Persian Gulf War (1991): Gore Vidal's American Chronicle series, John Updike's Rabbit tetralogy, and Larry Beinhart's American Hero. Olster then turns her attention to three non-American writers whose works explore the imperial sway of American popular culture on their nation's value systems: hierarchical class structure in Dennis Potter's England, Peronism in Manuel Puig's Argentina, and Nihonjinron consensus in Haruki Murakami's Japan. Finally, Olster returns to American literature to look at the contemporary media spectacle and the representative figure as potential sources of national consolidation after November 1963. Olster first focuses on autobiographical, historical, and fictional accounts of three spectacles in which the formulae of popular culture are shown to bypass differences of class, gender, and race: the John F.

Kennedy assassination, the Scarsdale Diet Doctor murder, and the O. J. Simpson trial. She concludes with some thoughts about the nature of American consolidation after 9/11.

The Guide to United States Popular Culture William Labov 2001 "To understand the history and spirit of America, one must know its wars, its laws, and its presidents. To really understand it, however, one must also know its cheeseburgers, its love songs, and its lawn ornaments. The long-awaited Guide to the United States Popular Culture provides a single-volume guide to the landscape of everyday life in the United States. Scholars, students, and researchers will find in it a valuable tool with which to fill in the gaps left by traditional history. All American readers will find in it, one entry at a time, the story of their lives."-- Robert Thompson, President, Popular Culture Association. "At long last popular culture may

indeed be given its due within the humanities with the publication of *The Guide to United States Popular Culture*. With its nearly 1600 entries, it promises to be the most comprehensive single-volume source of information about popular culture. The range of subjects and diversity of opinions represented will make this an almost indispensable resource for humanities and popular culture scholars and enthusiasts alike."-- Timothy E. Scheurer, President, American Culture Association "The popular culture of the United States is as free-wheeling and complex as the society it animates. To understand it, one needs assistance. Now that explanatory road map is provided in this Guide which charts the movements and people involved and provides a light at the end of the rainbow of dreams and expectations."--Marshall W. Educating Learners with Down

Syndrome Rhonda Faragher

2013-10-23

For individuals with Down syndrome, the extent of

the effect of intellectual disability depends largely on the degree of provision of appropriate support and intervention. In *Educating Learners with Down Syndrome*, editors Rhonda Faragher and Barbara Clarke have brought together a number of expert contributors, whose chapters review recent findings in the field of DS education, highlight promising practices, and identify areas for future research. While the emphasis is primarily on the school years, links to early intervention and to life post-16 are made, with chapters organized into three parts: conceptual overview of issues in learning and teaching, learning mathematics, and literacy development. The book is also united by the cohesive themes of assessment, evidence-based practice, and inclusive practices. *Educating Learners with Down Syndrome* importantly incorporates the voices of individuals with Down

syndrome, whose personal narratives add significance to the research mission of the text and demonstrate the authors' inclusive philosophy. Aimed at researchers, teacher educators, higher degree students, and policy makers, this book is the first of its kind to provide a compendium of research on educating learners with Down syndrome.

Adolescent Literacies Kathleen

A. Hinchman 2017-10-19

Showcasing cutting-edge findings on adolescent literacy teaching and learning, this unique handbook is grounded in the realities of students' daily lives. It highlights research methods and instructional approaches that capitalize on adolescents' interests, knowledge, and new literacies. Attention is given to how race, gender, language, and other dimensions of identity--along with curriculum and teaching methods--shape youths' literacy

development and engagement. The volume explores innovative ways that educators are using a variety of multimodal texts, from textbooks to graphic novels and digital productions. It reviews a range of pedagogical approaches; key topics include collaborative inquiry, argumentation, close reading, and composition.

Postmodernism and Popular Culture Angela McRobbie

2003-09-02 Postmodernism and Popular Culture brings together eleven recent essays by Angela McRobbie in a collection which deals with the issues which have dominated cultural studies over the last ten years. A key theme is the notion of postmodernity as a space for social change and political potential. McRobbie explores everyday life as a site of immense social and psychic complexity to which she argues that cultural studies scholars must return through ethnic and empirical work; the sound of living voices and spoken

language. She also argues for feminists working in the field to continue to question the place and meaning of feminist theory in a postmodern society. In addition, she examines the new youth cultures as images of social change and signs of profound social transformation. Bringing together complex ideas about cultural studies today in a lively and accessible format, Angela McRobbie's new collection will be of immense value to all teachers and students of the subject.

Consuming Schools Trevor

Norris 2011-01 The increasing
prevalence of consumerism in
contemporary society often
equates happiness with the
acquisition of material objects.
Consuming Schools describes the
impact of consumerism on politics
and education and charts the
increasing presence of
commercialism in the educational
sphere through an examination of
issues such as school-business
partnerships, advertising in
schools, and corporate-sponsored
curriculum. First linking the
origins of consumerism to
important political and
philosophical thinkers, Trevor

Norris goes on to closely examine the distinction between the public and the private sphere through the lens of twentieth-century intellectuals Hannah Arendt and Jean Baudrillard. Through Arendt's account of the human activities of labour, work, and action, and the ensuing eclipse of the public realm and Baudrillard's consideration of the visual character of consumerism, Norris examines how school commercialism has been critically engaged by in-class activities such as media literacy programs and educational policies regulating school-business partnerships.

Building Communities of Engaged Readers Teresa Cremin 2014-06-20 Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. **Building**

Communities of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child

knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

Toward a Literacy of Promise

Linda A. Spears-Bunton 2009
Bringing together theoretical perspectives on critical theory, literacy theory, and history, and analyses of qualitative data and qualitative research data from classroom research, this book examines popular assumptions about literacy and challenges readers to question how it has

been used historically both to empower and to oppress. It offers an alternative view of literacy - a literacy of promise - that charts an emancipatory agenda for literacy instructional practices in schools.

Deconstructing Popular Culture

Paul Bowman 2008-09-10

Popular culture permeates every aspect of our lives: from the music we listen to, the films and television shows we watch and the books we read. But who decides what counts as popular culture? Why is it so important? And how do we go about

studying it? This book provides a comprehensive introduction to popular culture and examines the problems and possibilities of studying this fast changing field. Employing a unique approach, Bowman uses techniques of deconstruction to unpick, analyse and deconstruct contemporary examples of popular culture. The book looks at music, Hollywood film and the self-help movement to question claims behind the importance of popular culture and encourage readers to form their own interpretations of the culture they experience every day. With theory interwoven throughout, but in a way that is barely noticeable to the reader, the book provides covers the important theoretical work in the field, whilst directing the reader through ways to avoid common pitfalls in studying theory. An innovative user guide and glossary explain essential terms and ideas, making difficult concepts relevant, accessible and

interesting. This witty, thought-provoking book provides a clear, novel introduction to popular culture for all students of cultural studies, media studies and sociology

Asian Popular Culture Anthony Y.H. Fung 2013-05-29 This book examines different aspects of Asian popular culture, including films, TV, music, comedy, folklore, cultural icons, the Internet and theme parks. It raises important questions such as – What are the implications of popularity of Asian popular culture for globalization? Do regional forces impede the globalizing of cultures? Or does the Asian popular culture flow act as a catalyst or conveying channel for cultural globalization? Does the globalization of culture pose a threat to local culture? It addresses two seemingly contradictory and yet parallel processes in the circulation of Asian popular culture: the interconnectedness between

Asian popular culture and western culture in an era of cultural globalization that turns subjects such as Pokémon, Hip Hop or Cosmopolitan into truly global phenomena, and the local derivatives and versions of global culture that are necessarily disconnected from their origins in order to cater for the local market. It thereby presents a collective argument that, whilst

local social formations, and patterns of consumption and participation in Asia are still very much dependent on global cultural developments and the phenomena of modernity, yet such dependence is often concretized, reshaped and distorted by the local media to cater for the local market.
