Routledge Handbook of Japanese Business and Management Parissa Haghirian 2016-01-29 The Routledge Handbook of Japanese Business and Management provides a comprehensive overview of management and business processes and practices in Japanese companies. The contributors combine theoretical findings and research results with a practical and contemporary view on how corporations and firms are managed in Japan. The handbook is divided into eight sections covering: historical perspectives on Japanese management; structure and theory of the Japanese firm; the corporate environment in Japan; the Japanese work environment; the Japanese market; manufacturing and logistics; interaction and communication; the future of Japanese management. This book is an essential reference resource for students and scholars working on Japanese companies, the Japanese market-place, Japanese consumers, or management processes in the Japanese firm. The book also provides an interesting and informative read for managers who need to deepen their knowledge on Japanese business processes.

Blessing and Curse of Intra-EU Mobility Christiane Heimann 2020-09-29 Christiane Heimann provides insights on how the economic and political situation in Spain, Germany and the UK affects the institutional implementation of free labour movement and how mobile EU citizens navigate the institutional policies strategically. The study examines different profiles of EU citizens exercising free labour movement and shows ways of EU labour recruitment and transnational labour integration taking into account the institutional implementation of related EU policies. Intra-Community mobility policies and practices will be assessed in terms of their effectiveness for international recruitment and labour integration.

Costs and Benefits of Cross-country Labour Migration in the GMS Hossein Jalilian 2012 International labour migration can be characterized in three ways - as human aspiration, tradition, and necessity. For some people, working overseas is a dream. For others, international labour mobility is a tradition. For a great number of people however, international labour migration is an economic necessity. It is the only viable solution to realize their basic human right to a decent life. GMS worker movements to Thailand typify all three characterizations of international labour mobility. While this book focuses on the economic dimensions of international labour emigration, principally from Cambodia, Laos and Vietnam to Thailand, it recognizes at the very outset the equal standing of non-economic motivations for migration.

Reframing Singapore Derek Thiam Soon Heng 2009 Over the past two decades, Singapore has advanced rapidly towards becoming a both a global city-state and a key nodal point in the international economic sphere. These developments have caused us to reassess how we understand this changing nation, including its history, population, and geography, as well as its transregional and transnational experiences with the external world. This collection spans several disciplines in the humanities and social sciences and draws on various theoretical approaches and methodologies in order to produce a more refined understanding of Singapore and to reconceptualize the challenges faced by the country and its peoples.

Christianity Across Borders Gemma Tulud Cruz 2021-07-29 This book offers a comprehensive exploration of key issues in contemporary global migration and considers the theological implications for Christianity, in general, and for Christian faith and practice in various parts of the world, in particular. Migrant Christians, who make up the majority of believers on the move and in diaspora, play an increasingly vital role in world Christianity today. Drawing on cases from across the globe, Gemma Tulud Cruz considers how Christians are faced with immense gifts and tremendous challenges brought by the ever-increasing presence of migrants in their midst and the conditions that characterize contemporary global migration. Migrant Christians themselves face multiple challenges, which have been made more stark by the coronavirus pandemic. The volume will be relevant to scholars of religion and of migration who are interested in a closer examination of what happens to Christians and Christianity, (faith) communities, and nation-states in the age of migration.

Workers' Dilemmas Margaret Grieco 1996 Workers' Dilemmas reexamines the relationships between social networks and labour markets. The author argues provocatively about the ways in which work patterns, family structure and community networks interrelate.

A Web-Based Approach to Measure Skill Mismatches and Skills Profiles for a Developing Country: Jeisson Arley Cárdenas Rubio 2020-12-30 "Several interdisciplinary studies highlight imperfect information as a possible explanation of skill mismatches, which in turn has implications for unemployment and informality rates. Despite information failures and their consequences, countries like Colombia (where informality and unemployment rates are high) lack a proper labour market information system to identify skill mismatches and employer skill requirements. One reason for this absence is the cost of collecting labour market data. Recently, the potential use of online job portals as a source of labour market information has gained the attention of researchers and policymakers, since these portals can provide quick and relatively low-cost data collection. As such, these portals could be of use for Colombia. However, debates continue about the efficacy of this use, particularly concerning the robustness of the collected data. This book implements a novel mixed-methods approach (such as web scraping, text mining, machine learning, etc.) to investigate to what extent a web-based model of skill mismatches can be developed for Colombia. The main contribution of this book is demonstrating that, with the proper techniques, job portals can be a robust source of labour market information. In doing so, it also contributes to current knowledge by developing a conceptual and methodological approach to identify skills, occupations, and skill mismatches using online job advertisements, which would otherwise be too complex to be collected and analysed via other means. By applying this novel methodology, this study provides new empirical data on the extent and nature of skill mismatches in Colombia for a considerable set of non-agricultural occupations in the urban and formal economy. Moreover, this information can be used as a complement to household surveys to monitor potential skill shortages. Thus, the findings are useful for policymakers, statisticians, and education and training providers, among others."

The benefits and challenges of leveraging social media recruitment practices Patrick Hayes 2013-06-25 Thesis (M.A.) from the year 2012 in the subject Business economics - Personnel and Organisation, grade: B, University of Limerick, course: MA in Business Management, language: English, abstract: In the last decade labour market shortages and recruitment difficulties have led to a more competitive and challenging recruitment market worldwide. These forces make it more important than ever for recruiting teams in organisations to be effective, efficient and creative in the search for talent. As a response, there is a shift from traditional recruiting methods to a new social recruiting approach. This paper will focus on the differences between traditional and social methods of recruiting, identify the key reasons behind the change and discuss the benefits as well as the potential risks. To measure the success of social recruiting the paper will look at reports from leading social recruiting solution companies and case studies of various sized organisations. This paper concludes that there has been a significant shift in usage from traditional recruiting techniques to social recruiting, that social recruiting is increasingly being used by both large and small organisations and is fast becoming a favoured medium of both employers and job-seekers alike. It also concludes that organisations cannot ignore the importance of creating a social recruitment strategy, owing to its role in improving cost of hire, quality of hire and time to hire. The findings are based on secondary research of academic books, journals, reports and case studies covering the areas of social media, recruitment and LinkedIn. The significance of this paper is that it will be a valuable source of information for all organisations looking to leverage social recruiting - and in particular LinkedIn’s hiring solutions - to start recruiting. The attached literature review as part of this study is also a good starting point for anyone looking to explore the topics of recruitment, social media and LinkedIn. Keywords: Social media, Social networking, Recruitment strategy, LinkedIn

Labour Mobility in the EU Kristina Toplak 2018-09-01 V šestih prispevkih monografije so analizirani obstoječi in porajajoči se izzivi na področju delovne mobilnosti v Evropski uniji, pri čemer jih avtorji obravnavajo skozi prizmo mobilnih delavcev v različnih poklicih. Z večdisciplinarnim pristopom in uporabo različnih metodoloških prijemov so avtorji ustvarili ogrodje za analitične diskusije o učinkih mobilnosti v EU, učinkovitosti in pravičnosti prostega pretoka oseb znotraj EU ter večplastnosti posledic za posameznike, države članice in nacionalne politike. Prvi prispevek je teoretski uvod v tematiko, ki mobilnost izčrпно predstavi kot teoretski koncept, politično agendo in temeljno evropsko vrednoto. Kompleksni preplet mnogoterih učinkov delovne mobilnosti, ki se pojavljajo na več ravneh, je v nadaljevanju obravnavan v petih študijah primera. Le-te osvetljujejo dileme, paradokse, učinke in posledice notranje mobilnosti v EU na primerih mobilnih zdravstvenih delavcev, umetnikov in kulturnih delavcev, napotenih delavcev, skrbstvenih delavk in visoko izobraženih delavcev. Vsi predstavljeni primeri so rezultat večletnih znanstvenoraziskovalnih prizadevanj in aktivnega delovanja avtorjev v različnih projektih s področja mobilnosti.

The Fourth Industrial Revolution Klaus Schwab 2017-01-03 The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In The Fourth Industrial Revolution, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas

for what can be done to shape a better future for all.

Brokering Circular Labour Migration Huey Shy Chau 2020-03-30 This book examines the commercialisation of domestic and care work through private agencies that organise transnational care arrangements by brokering migrant workers. The book focuses on the emergence of private for-profit home care agencies following the 2011 extension of the Free Movement of Workers to Eastern European Countries agreement in Switzerland. The agencies recruit migrant women from these countries and place them in private households for elderly care. This book explores how circular labour migration for these care workers is facilitated. In the form of a mobile ethnography, it traces their journey from Eastern European countries to Switzerland – from when care workers find employment and are recruited by agencies to when they arrive at their designated households. From the agencies’ analytical standpoint, the book examines the recruitment and placement practices of the home care agencies and their role in facilitating migration. Brokering Labour Migration offers an understanding of new migration patterns and highlights fundamental changes in migration control with the extension of free movement of workers in Switzerland to lower-wage countries in Eastern Europe. It will be an invaluable resource for academics and scholars of geography, anthropology, sociology, and gender and migration.

Labour, Mobility and Temporary Migration Julie Knight 2017-06-15 Labour, Mobility and Temporary Migration delves into sociological research on Polish migrants who migrated to the lesser-explored South Wales region after Poland joined the European Union in 2004. At the time of enlargement, Polish migrants were characterised as being economically motivated, short-term migrants who would enter the UK for work purposes, save money and return home. However, over ten years after enlargement, this initial characterisation has been challenged with many of the once considered ‘short-term’ Poles remaining in the UK. In the case of Wales, the long-term impact of this migration is only starting to be fully realised, particularly in consideration of the different spatial areas – urban, semi-urban and rural – explored in this book. Such impact is occurring in the post-Brexit referendum period, a time when the UK’s position in the EU is itself complex and changing.

The Formation of a Labour Market in Russia Simon Clarke 1999 Clarke (sociology, U. of Warwick, England) draws on data from statistical surveys and case studies collected within the framework of a large-scale collaborative research program by development agencies on the restructuring of labor and employment in Russia. He reviews the historical context and tackles theoretical issues before providing a detailed analysis of the development of the labor market through the interaction of strategies by employers and employees. Two more volumes are expected to emerge from the study, on the segmentation of the Russian labor market and on household survival strategies, presumably during those long months or years when workers are not being paid.
