THE PERIODIC TABLE EXCERPT About Research &  
Education Association Research & Education  
Association (REA) is an organization of educators,  
scientists, and engineers specializing in various  
academic fields. Founded in 1959 with the  
purpose of disseminating the most recently  
developed scientific information to groups in  
industry, government, high schools, and  
universities, REA has since become a successful  
and highly respected publisher of study aids, test  
preps, handbooks, and reference works. REA's  
Test Preparation series includes study guides for  
all academic levels in almost all disciplines.  
Research & Education Association publishes test  
preps for students who have not yet completed  
high school, as well as high school students  
preparing to enter college. Students from  
countries around the world seeking to attend  
college in the United States will find the  
assistance they need in REA's publications. For  
college students seeking advanced degrees, REA  
publishes test preps for many major graduate  
school admission examinations in a wide variety  
of disciplines, including engineering, law, and  
medicine. Students at every level, in every field,  
with every ambition can find what they are  
looking for among REA's publications. While most  
test preparation books present practice tests that  
bear little resemblance to the actual exams,  
REA's series presents tests that accurately depict

the official exams in both degree of difficulty and  
types of questions. REA's practice tests are  
always based upon the most recently  
administered exams, and include every type of  
question that can be expected on the actual  
exams. REA's publications and educational  
materials are highly regarded and continually  
receive an unprecedented amount of praise from  
professionals, instructors, librarians, parents, and  
students. Our authors are as diverse as the fields  
represented in the books we publish. They are  
well-known in their respective disciplines and  
serve on the faculties of prestigious high schools,  
colleges, and universities throughout the United  
States and Canada. CHAPTER 1 - ABOUT THE SAT

This book provides you with an accurate and  
complete representation of the SAT II: Chemistry  
Subject Test. Inside you will find a complete  
course review designed to provide you with the  
information and strategies needed to do well on  
the exam, as well as six practice tests based on

explanations designed to help you master the  
test material. ABOUT THE TEST Who Takes the  
Test and What Is It Used For? Students planning  
to attend college take the SAT II: Chemistry  
Subject Test for one of two reasons: (1) Because  
it is an admission requirement of the college or  
university to which they are applying; "OR" (2) To  
demonstrate proficiency in Chemistry. The SAT II:  
Chemistry exam is designed for students who  
have taken one year of college preparatory  
chemistry. Who Administers The Test? The SAT II:  
Chemistry Subject Test is developed by the  
College Board and administered by Educational  
Testing Service (ETS). The test development  
process involves the assistance of educators  
throughout the country, and is designed and  
implemented to ensure that the content and  
difficulty level of the test are appropriate. When  
Should the SAT II: Chemistry be Taken? If you are  
applying to a college that requires Subject Test  
scores as part of the admissions process, you  
should take the SAT II: Chemistry Subject Test  
toward the end of your junior year or at the  
beginning of your senior year. If your scores are  
being used only for placement purposes, you

may be able to take the test in the spring of your senior year. For more information, be sure to contact the colleges to which you are applying.

**When and Where is the Test Given?** The SAT II: Chemistry Subject Test is administered five times a year at many locations throughout the country; mostly high schools. **HOW TO USE THIS BOOK**

**What Do I Study First?** Remember that the SAT II: Chemistry Subject Test is designed to test knowledge that has been acquired throughout your education. Therefore, the best way to prepare for the exam is to refresh yourself by thoroughly studying our review material and taking the sample tests provided in this book. They will familiarize you with the types of questions, directions, and format of the SAT II: Chemistry Subject Test. To begin your studies, read over the review and the suggestions for test-taking, take one of the practice tests to determine your area(s) of weakness, and then restudy the review material, focusing on your specific problem areas. The course review includes the information you need to know when taking the exam. Be sure to take the remaining practice tests to further test yourself and become familiar with the format of the SAT II: Chemistry Subject Test.

**When Should I Start Studying?** It is never too early to start studying for the SAT II: Chemistry test. The earlier you begin, the more time you will have to sharpen your skills. Do not procrastinate! Cramming is not an effective way to study, since it does not allow you the time needed to learn the test material. The sooner you learn the format of the exam, the more comfortable you will be when you take the exam.

**FORMAT OF THE SAT II: CHEMISTRY** The SAT II: Chemistry is a one-hour exam consisting of 85

multiple-choice questions. The first part of the exam consists of classification questions. This question type presents a list of statements or questions that you must match up with a group of choices lettered (A) through (E). Each choice may be used once, more than once, or not at all. The exam then shifts to relationship analysis questions which you will answer in a specially numbered section of your answer sheet. You will have to determine if each of two statements is true or false and if the second statement is a correct explanation of the first. The last section is composed strictly of multiple-choice questions with choices lettered (A) through (E).

**Material Tested** The following chart summarizes the distribution of topics covered on the SAT II: Chemistry Subject Test.

Topic	Percentage	Number of Questions

Stoichiometry	12%	10 questions
Equilibrium & Reaction Times	7%	6 questions
Thermodynamics	6%	5 questions
Descriptive Chemistry	13%	11 questions
Laboratory	8%	7 questions

The questions on the SAT II: Chemistry are also grouped into three larger categories according to how they test your understanding of the subject material.

Category	Approximate Percentage of Test
1) Factual Recall / Demonstrating a knowledge and understanding of important concepts and specific information	20%
2) Application / Taking a specific principle and applying it to a practical situation	45%
3) Integration / Inferring information and drawing conclusions from particular relationships	35%

**STUDYING FOR THE SAT II: CHEMISTRY** It is very important to choose the time and place for studying that works best for you. Some students may set aside a certain number of hours every morning to study, while others may choose to study at night before going to sleep. Other students may study during the day, while waiting on line, or even while eating lunch. Only you can determine when and where your study time will be most effective. Be consistent and use your time wisely. Work out a study routine and stick to it! When you take the practice tests, try to make your testing conditions as much like the actual test as possible. Turn your television and radio off, and sit down at a quiet desk or table free from

distraction. Make sure to clock yourself with a timer. As you complete each practice test, score it and thoroughly review the explanations to the questions you answered incorrectly; however, do not review too much at any one time.

Concentrate on one problem area at a time by reviewing the questions and explanations, and by studying our review until you are confident you completely understand the material. Keep track of your scores. By doing so, you will be able to gauge your progress and discover general weaknesses in particular sections. You should carefully study the reviews that cover your areas of difficulty, as this will build your skills in those areas. TEST TAKING TIPS Although you may be unfamiliar with standardized tests such as the SAT II: Chemistry Subject Test, there are many ways to acquaint yourself with this type of examination and help alleviate your test-taking anxieties. Become comfortable with the format of the exam. When you are practicing to take the SAT II: Chemistry Subject Test, simulate the conditions under which you will be taking the actual test. Stay calm and pace yourself. After simulating the test only a couple of times, you will boost your chances of doing well, and you will be able to sit down for the actual exam with much more confidence. Know the directions and format for each section of the test. Familiarizing yourself with the directions and format of the exam will not only save you time, but will also ensure that you are familiar enough with the SAT II: Chemistry Subject Test to avoid nervousness (and the mistakes caused by being nervous). Do your scratchwork in the margins of the test booklet. You will not be given scrap paper during the exam, and you may not perform scratchwork on your answer sheet. Space is provided in your test booklet to do any necessary work or draw diagrams. If you are unsure of an answer, guess. However, if you do guess - guess wisely. Use the process of elimination by going through each answer to a question and ruling out as many of the answer choices as possible. By eliminating three answer choices, you give yourself a fifty-fifty chance of answering correctly since there will only be two choices left from which to make your guess. Mark your answers in the appropriate spaces on the answer sheet. Fill in the oval that corresponds to your answer darkly, completely, and neatly. You can change your answer, but

remember to completely erase your old answer. Any stray lines or unnecessary marks may cause the machine to score your answer incorrectly. When you have finished working on a section, you may want to go back and check to make sure your answers correspond to the correct questions. Marking one answer in the wrong space will throw off the rest of your test, whether it is graded by machine or by hand. You don't have to answer every question. You are not penalized if you do not answer every question. The only penalty results from answering a question incorrectly. Try to use the guessing strategy, but if you are truly stumped by a question, remember that you do not have to answer it. Work quickly and steadily. You have a limited amount of time to work on each section, so you need to work quickly and steadily. Avoid focusing on one problem for too long. Before the Test Make sure you know where your test center is well in advance of your test day so you do not get lost on the day of the test. On the night before the test, gather together the materials you will need the next day: - Your admission ticket - Two forms of identification (e.g., driver's license, student identification card, or current alien registration card) - Two No. 2 pencils with erasers - Directions to the test center - A watch (if you wish) but not one that makes noise, as it may disturb other test-takers On the day of the test, you should wake up early (after a good night's rest) and have breakfast. Dress comfortably, so that you are not distracted by being too hot or too cold while taking the test. Also, plan to arrive at the test center early. This will allow you to collect your thoughts and relax before the test, and will also spare you the stress of being late. If you arrive after the test begins, you will not be admitted to the test center and you will not receive a refund. During the Test When you arrive at the test center, try to find a seat where you feel most comfortable. Follow all the rules and instructions given by the test supervisor. If you do not, you risk being dismissed from the test and having your scores canceled. Once all the test materials are passed out, the test instructor will give you directions for filling out your answer sheet. Fill this sheet out carefully since this information will appear on your score report. After the Test When you have completed the SAT II: Chemistry Subject Test,

you may hand in your test materials and leave. Then, go home and relax! When Will I Receive My Score Report and What Will It Look Like? You should receive your score report about five weeks after you take the test. This report will include your scores, percentile ranks, and interpretive information.
